

Organic Vegetable Oils

In control from seed to oil

About Spack

.....

Spack was founded in 1977 by Mr C.D. Spaargaren as a supplier of vegetable oils and has undergone continuous growth in recent decades. Now under the care of the 2nd generation Spack produces both cold-pressed and refined organic vegetable oils in a variety of packaging.

Our products are delivered worldwide to wholesalers, foodservice and retailers.

As a by-product, we also supply press cakes or expellers for animal feed. Over the years Spack has grown to become an established name in the global organic market.

For more information about Spack, please take a look at our website www.spackbv.com.

Our company history

.....

1977: Spack is established in Rotterdam by Mr. C.D. Spaargaren as a trading company in conventional vegetable oils, fats and by-products.

1980: Spack takes over a filling installation in Eindhoven.

1981: All trade and filling activities move to a new location in Hellevoetsluis.

1992: Spack becomes organic certified.

1999: Due to continued growth and expansion, the Hellevoetsluis site has become too small. Spack moves to a new premises in Oostvoorne.

2008 Spack becomes BRC & IFS certified.

2012: Once again Spack has outgrown its premises and moves to its current location in Nieuwe Tonge.

2015: Spack expands with Bio Perserij Harlingen for crushing organic sunflower- and rapeseeds.

2018: Spack has started setting up a brand new organic coconut processing facility in Vietnam.

2019: Spack International starts operating in the USA.

2020: Spack has been a shareholder in Holland Filling Industries B.V., this enables us to bundle our knowledge and skills to jointly offer a wide range of products and packaging materials.

2021: The organic coconut processing facility in Vietnam is officially up and running.

Organic coconut facility

We are very proud that Spack has an organic coconut processing facility in Vietnam. Spack supplies the following organic coconut products: Coconut flour, virgin coconut oil, coconut water, coconut milk and coconut cakes.

Having a coconut facility allows Spack to be in full control of its various organic coconut products, from field to the final product.

The organic coconut products are available in different kind of packaging, varying from small to large packaging.

For more information about the facility, please scan the QR-code.

Holland Filling Industries

Since 1 January 2020 Spack has been a shareholder in Holland Filling Industries B.V. (HFI).

Holland Filling Industries specialises in filling organic and conventional vegetable oils under its own Fusion brand and private label, mainly in PET packaging. This collaboration with HFI enables us to bundle our knowledge and skills to jointly offer a wide range of new products and packaging materials.

For more information about HFI, please take a look at their website www.hfi-filling.com.

Crushing facilities

We crush our main products, organic sunflower- and rapeseeds, in multiple crushing facilities located in the Netherlands. This enables us to produce high-quality oil 24 hours a day. In addition to our main products, we also work closely with a number of small crushing facilities located in Germany that press our organic flax, hemp, sesame and safflower seeds.

Spack supplies the following expellers:

- Organic sunflower expellers
- Organic rapeseed expellers
- Organic flaxseed expellers
- Organic hempseed expellers
- Organic sesame expellers
- Organic safflower expellers

During the production of the organic vegetable oils, compressed solids remain. These so-called expellers are given a second life as an ingredient in animal feed. In this way, we avoid waste and contribute to a sustainable way of doing business.

Filling and Packaging

Spack is equipped for filling oils and fats in different kinds of packaging. We have multiple filling lines, heating tanks and extensive storage facilities which we use for these activities.

With four different production lines, we are able to quickly switch between different packaging and products, which makes us flexible. We can pack from 100 ml bottles up until 1.000 liter containers. Without any problems, we can produce both small orders and full truckloads.

Private label

We fill our consumer packaging under private label, intended for wholesale, foodservice, retail and health food stores. We are happy to share our thoughts with you about suitable packaging for your products.

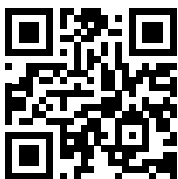

Quality control

Spack places high demands on the quality and food safety of its products. In order to guarantee and maintain this quality, we check our products throughout the whole production chain process. From purchase at the origin to the manufactured and packaged product.

Spack has its own quality department and laboratory equipped with the most advanced equipment.

Spack has the following certificates:
IFS, BRC, SKAL, FAIRTRADE, GMP+, USDA, GMP+, RSPO, KOSHER, KRAV.
